## **Bioenergy Life Science Unveils New RIBOSE Formulation Center**

*Offers food, beverage and supplement manufacturers  
formulation assistance and prototype development*

**March 2, 2010 – Minneapolis, Minn.** – Bioenergy Life Science, Inc., ([www.bioenergyribose.com](http://www.bioenergyribose.com)) introduces its new RIBOSE formulation center developed to help food, beverage and supplement manufacturers with RIBOSE product concept development, supplement formulations, functional food prototypes and marketing information. Bioenergy Life Science, Inc., is the world's leading company for RIBOSE and markets the only patented brand as Bioenergy RIBOSE™.

"Bioenergy is very excited to be introducing the RIBOSE Formulation Center," said Kathy Lund, vice president of sales and marketing for Bioenergy Life Science. "Customers are expecting more in-depth product knowledge when formulating new products. This initiative will offer services related to concept and formulation development making it easier for companies to create and formulate products featuring Bioenergy RIBOSE."

The center features a dedicated team offering information to manufacturers interested in adding Bioenergy RIBOSE into existing products or investigating its potential for new products. A number of pilot scale prototypes have already been developed that include chocolates, oatmeal, cereals and bars. From these prototypes and other products that have been developed, the Bioenergy team has a database of knowledge of how Bioenergy RIBOSE performs in a number of manufacturing conditions.

"We want to be as helpful as possible to customers through assisting them in formulating products more efficiently. We can help apply the knowledge already gained from years of experience working with Bioenergy RIBOSE," said Adia Edwards, quality control manager and formulation center team member for Bioenergy RIBOSE.

Some of the expertise that the RIBOSE Formulation Center offers includes RIBOSE formulation tips, working with RIBOSE under various manufacturing conditions and ingredient as well as finished product stability data.

**- more -**

In addition to the dedicated team from Bioenergy, the center will also offer access to product development experts in the food and beverage industry. They include Joanne Haase and Sangeeta Patel, Ph.D. Joanne is founder of the Haase Consulting Group and has over 25 years experience in consumer marketing – helping companies identify opportunities and develop consumer products. Dr. Patel is founder of Product Solutions, Inc., and has been involved in the formulation of over 500 nutritional and food products.

Bioenergy RIBOSE stimulates the synthesis of ATP, the essential energy compound found in every cell in the body. ATP is critical for maintaining normal energy-related functions, and RIBOSE is the essential component. Traditionally used to aid cardiovascular health, Bioenergy RIBOSE has begun making inroads in the energy and sports nutrition markets as a healthy, natural means of providing increased energy that helps in gaining a competitive edge. For more information, visit the Bioenergy RIBOSE web site at <http://www.bioenergyribose.com>.

### **About Bioenergy**

Bioenergy, Inc. — The Ribose Company™ — recently achieved GRAS (Generally Recognized As Safe) status for D-Ribose from the U.S. Food and Drug Administration. The privately held, Minneapolis-based life sciences company has amassed a large body of scientific literature on the uses of RIBOSE for people across all age and health categories.

Bioenergy has more than 10,000 customers for its proprietary Corvalen® products alone, and millions worldwide use Bioenergy RIBOSE in leading functional foods such as energy bars and beverage. Currently, Bioenergy RIBOSE is included as an ingredient in hundreds of products worldwide. The company's core technology lies in the development and commercialization of products based on the physiological benefits of D-Ribose for health and wellness.
