BIOENERGY, INC. ANNOUNCES NEW SENIOR PROJECT MANAGER

MINNEAPOLIS (Aug. 11, 2010) – Bioenergy, Inc., an integrated life science company specializing in the development and commercialization of D-Ribose for health and wellness, announced today that Daniel Lippert has joined the company as a senior project manager. In this position, Lippert will manage and support D-Ribose new product development, studies and clinical trials for Bioenergy pharmaceuticals, medical foods and supplement products.

“We’re pleased to welcome Daniel to the Bioenergy team,” said Jeff Thompson, vice president of strategic planning for Bioenergy. “With more than 28 years of experience working in FDA-regulated industries, Daniel brings invaluable experience to his role as senior project manager.”

Prior to joining Bioenergy, Lippert led product development and quality control systems development teams as a senior project manager at KV Pharmaceutical in St. Louis. His background also includes more than a decade in research positions at 3M Corporation.

Lippert holds a bachelor’s degree in chemistry from Concordia College in Moorhead, Minnesota.

About Bioenergy, Inc.

Bioenergy, Inc. is a privately held, Minneapolis-based life sciences company whose core technology lies in the development and commercialization of products based on the physiological benefits of D-ribose in health and wellness. For more information, visit www.bioenergy.com.
